ELITE T-SHIRT

The T-shirt that says something about the way you work. It's lightweight, breathable and wicking. And it has that nifty kind of styling that flags its own technical performance. It'll keep you cool – and looking way cooler than anyone who's still wearing a T-shirt advertising a band they saw five years ago.

MATERIALS

170gsm

100% Polyester

FEATURES

Moisture wicking

Lightweight

Breathable

Excellent colour retention

Reflective print to shoulders

SIZES

S | M | L | XL | 2XL

COLOURS

Black | Grey | Navy

NEW

155 TUFFSTUFF LOGO T-SHIRT

A classic crew neck T-shirt, crafted from breathable cotton and styled with the Tuffstuff Logo. It has a regular fit and short sleeves for everyday wear. Its 100% cotton construction adds natural stretch and its reinforced shoulders ensure its up to the job.

MATERIALS

180gsm

100% Cotton

FEATURES

Made for everyday wear

Classic styling for a professional look

Flexible stretch fabric for ease of movement

Reinforced at the shoulder seam and back of the neck

SIZES

Black | Navy

275

DOWNHAM BODYWARMER

The Downham's contemporary styling keeps your brand looking fresh and relevant. This is the performance bodywarmer for a team that goes on delivering whatever the weather. A durable quilted outer conceals a cosy fleece lining, and two zipped pockets let chilly hands share the warmth.

MATERIALS

100% Polyester

FEATURES

- Hardwearing outer
- Comfortable fleece lining
- Internal pocket
- Zippered handwarmer pockets
- Fully padded for extra warmth
- Inside chest pocket

SIZES

S | M | L | XL | 2XL

COLOURS

Black | Navy

223

CARLTON BODYWARMER

Year-round outdoor layering begins with this high-necked quilted bodywarmer. Great for early risers when there's still a nip in the summer morning air; invaluable against snow and frost when worn as a cosy, air-trapping layer beneath a winter coat. Three zipped pockets make it practical too.

MATERIALS

180gsm Quilting

100% Polyester

FEATURES

Hardwearing outer

Zipped chest pocket

Two zipped side entry pockets

Embroidery access

SIZES

SIZE CHART

The following size charts are a general guide to product sizing when garments are marked, small, medium, large and so on, Each type and style of garment, depending on which layer it is, will have an appropriate ease allowance built into it to enable it to be worn over/ under other layers. This may vary from manufacturer to manufacturer.

WORKWEAR

GARMENT SIZE	XS	S	M	L	XL	2XL	3XL
CHEST INCHES	32 - 34	36 - 38	40 - 42	44 - 46	48 - 50	52 - 54	56 - 58
CHEST CM	81 - 86	92 - 96	102 - 107	112 - 117	122 - 127	132 - 137	142 - 147
WAIST INCHES	26 - 28	30 - 32	34 - 36	38 - 40	42 - 44	46 - 48	50 - 52

HOW TO MEASURE

CHEST Around the chest, just under the arms and across the shoulder blades

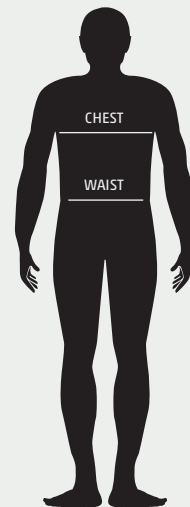

WAIST Around the narrowest part of the waist

FOOTWEAR

UK	6	7	8	9	10	11	12	13
EURO	40	41	42	43	44	46	47	48

HOW TO MEASURE

Use the ruler to measure the length of your foot from the longest toe (usually the big toe, but depends on the foot) to the back of your heel

CHILDS WEAR

SIZE	20	22	24	26	28	30	32	34
AGE	1 - 2	2 - 3	3 - 4	5 - 6	7 - 8	9 - 10	11 - 12	13

WHAT IS EN343

EN343 is a European Standard for protective clothing that outlines a minimum level of protection against wet weather.

Items are assessed on two criteria; the first **(X)** judges its ability to protect against water penetration, while the second **(Y)** measures breathability in those conditions. They are then rated from one to three in these categories:

(X) WATER PENETRATION RESISTANCE		(Y) BREATHABILITY	
1	Minimum level of rain protection	1	Not classified as breathable under EN343
2	Intermediate rain protection	2	Intermediate level of breathability
3	Highest level of rain protection	3	Highest level of breathability

This rating is included on the CE label inside the garment, where the EN343 mark will be followed by two numbers.

WHAT DOES EN ISO 20345 : 2011 MEAN?

It specifies basic and additional (optional) requirements for safety footwear. All products MUST meet the minimum safety standards set out by the International Organization for Standardization (ISO). This is the current standard for safety footwear across Europe (EN) and was updated in 2011 to become even more stringent. All safety footwear must now have toe protection against a 200-joule impact. This basically means the amount of energy the toe region can absorb before breaking.

ABBREVIATIONS YOU NEED TO KNOW

Protective boots and shoes come in many forms. There are antistatic shoes, ECD (Electro Static Discharge) safety shoes, cut-resistant boots and footwear that is specifically designed to protect particularly delicate parts of the foot like the metatarsal.

FUEL OIL-RESISTANT OUTSOLE

SAFETY BOOT RATING EXPLAINED

There's a clear system in place to gauge the level of protection offered by safety footwear. You've probably heard the term "S3 safety boots" before. It sounds more complex than it is. Here's a breakdown of the safety boot/shoe rating used in the UK.

SB

TOE PROTECTION

The basic safety standard for footwear. These have toe protection against a 200-joule impact. They may also have additional safety features which will be shown via other symbols. For example, if you see SB-P this means that the safety footwear also has the additional feature of Penetration Resistance of the Midsole.

S1

ANTISTATIC, OIL-RESISTANT & ENERGY ABSORPTION

On top of the basic toe protection, S1 ensures the footwear has antistatic protection, is resistant to fuel oil and has energy absorption in the heel. Again other symbols can be added, such as S1-P as above.

S2

PREVENTS WATER PENETRATION

S2 has all the same as S1, plus the added protection of preventing water penetration and absorption of the upper.

S3

MIDSOLE PENETRATION RESISTANCE

S3 safety footwear encompasses all the same levels of protection as S2, plus midsole penetration resistance.

S4

LEAK-PROOF

All the protection offered by S1 but with an entirely moulded polymer/rubber (e.g. Wellington Boots) making them waterproof and leak-proof.

S5

LEAK-PROOF WITH MIDSOLE PENETRATION RESISTANCE

All the same features of S4 footwear with the added benefit of midsole penetration resistance.

STANDARDS FOR NON-SLIP SHOES

SRA

TESTED ON CERAMIC TILE WETTED WITH SODIUM LAURYL SULPHATE (A DILUTED SOAP SOLUTION)

SRB

TESTED ON STEEL WITH GLYCEROL

SRC

TESTED UNDER SRA AND SRB CONDITIONS

CORDURA®
BRAND

F A B R I C

CORDURA® fabric provides rugged durable performance for a variety of end uses. Products made with CORDURA® fabric feature enhanced tear and abrasion resistance, and long-lasting durability.

3M
Thinsulate™
INSULATION

Thinsulate™ insulation works by trapping air molecules between you and the outside environment. Because the microfibres in 3M Thinsulate™ insulation are far finer than other fibres, they trap more air in less space, which naturally makes it a better insulator.

COOLMAX®

Fabric made with COOLMAX® CORE technology transports moisture away from the body to keep the wearer cool and dry, helping to optimize performance.

MANUFACTURED WITH
FOR-TEX™
PERFORMANCE FABRIC

A PU-coated, tear-resistant fabric combined with durable 100% polyester tricot knit. For-TEX fabric is fully waterproof, oil and grease resistant and easy to wipe clean. All garments are finished with welded seams for maximum water-resistance.

MANUFACTURED USING
TUFF-TEX™
PERFORMANCE FABRIC

A rugged and tough endurance fabric incorporating amplified tear and scuff resistance and long-lasting durability. Tuff-TEX is used in the places that require the most protection, ensuring you get lasting performance and protection from your garment.

MANUFACTURED WITH
TUFF-TEX™ 2.0
PERFORMANCE FABRIC

A rugged, tough and flexible reinforcement fabric - incorporating a structured weave with extra high durability, amplified tear and scuff resistance and a water-resistant backing. Tuff-TEX 2.0 is used in the places that require protection and enhanced movement, ensuring you get lasting performance and protection from your garment.
